

What is Zoning?

Zoning is a commonly used land use management tool in planning. Traditionally, zoning is the process by which a community is divided into districts or "zones." It separates incompatible land uses and limits industrial, commercial, and residential development to specific "zones". Each "zone" has a different set of uses, densities, dimensional requirements, and other development standards.

Zoning also allows a variety of uses to exist harmoniously together within a community. Zoning helps protect public and private interests, preserve critical areas, promote orderly growth, and encourages development at a rate and manner that reflects the community desires and vision through the policies set forth in the adopted Land Use Plan.

A full explanation of all zones, land uses, and development standards can be found in the Brunswick County Unified Development Ordinance available online at [www.brunswickcountync.gov](http://www.brunswickcountync.gov)

What is a Rezoning?

A **REZONING** is required when a property owner proposes to use his/her land for purposes other than permitted by the current zoning classification. Rezoning requests are reviewed for recommendation by the Planning Department Staff and Planning Board and then forwarded to the Board of Commissioners for the final determination.

All rezonings must be CONSISTENT with the Brunswick County CAMA Land Use Plan Map. If an applicant can demonstrate a change in the character of an area that warrants a departure from the adopted Land Use Plan or demonstrate that the request is consistent with one or more of the adopted Land Use Plan Policies located within the Brunswick County CAMA Land Use Plan Update document, then the applicant can request a Land Use Amendment. A Land Use Amendment can be requested in conjunction with the rezoning request (A copy of the Brunswick County CAMA Land Use Plan and Map can be obtained online at [www.brunswickcountync.gov](http://www.brunswickcountync.gov)).
